CLINIC MANAGEMENT SYSTEM
HealthSync Clinic
Wizard
Login
MODERN, CLEAN, MOBILE-FIRST
Appointment booking without the usual form fatigue.
Patients move through one clear question at a time: select a specialty, pick a doctor, choose a time, and confirm. Staff, admins, and end users now access their role-specific dashboards from a separate secure login.

Your progress is stored locally in this browser so patients can safely resume later.
Recommended production state strategy
Use a persisted store for the wizard so step data survives refreshes.
Sync final bookings to the backend only after the user confirms.
Protect each step with validation before moving forward.
